Week 4 Session A

Tuesday, Feb 3 2026

Overview

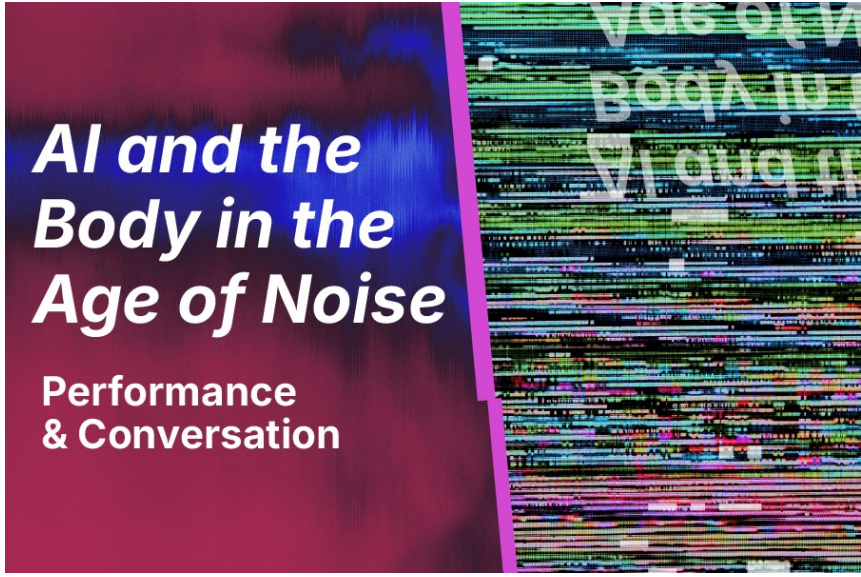
- Logistics:
  - Plans for Week 5 and Week 6
  - End of Year Celebration
- Workshop:
  - Setting Up with HPCC
  - Registration for UURAF
  - Feedback on UURAF Abstract
- Week 4 Assignment

Week 5's Plan

- Tuesday, 2/10 *Data Center Field Trip Day!*
  - Location: west campus
  - 4PM - 5PM, we need to arrive 10 minutes early
- Thursday, 2/12 *Back to **Normal Class** Day!*
  - Location: DSL (in the library)
  - 4:10PM - 5:20PM

Week 6's Plan

- ~~Tuesday, 2/17 *NO CLASS!*~~
  - Please visit this event "AI and the Body in the Age of Noise" on **2/12**, 7 - 8:30PM (Registration required)
- Thursday, 2/19 *Back to **Normal Class** Day!*
  - Location: DSL (in the library)
  - 4:10PM - 5:20PM



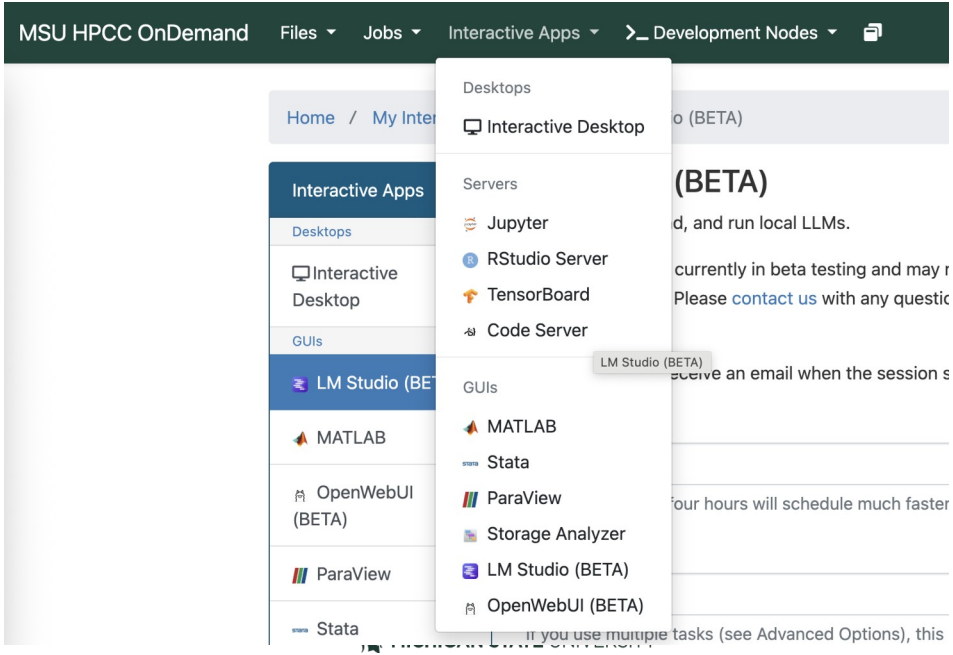
Digital Humanities End of Year Celebration

- Week 14 Thursday, 4/23 *End of Year Celebration!*
  - Location: LEADR (Old Horticultural Building, Rm 112; 506 E. Circle Drive)
  - 3PM - 5PM (Registration required)

Workshop - Part I

- Setting up with HPCC

1. Login here: ondemand.hpcc.msu.edu/pun/sys/dashboard
2. Select “Interactive Apps” tab, and click “LM Studio”



Workshop - Part I

- Setting up with HPCC

3. Based on this documentation, set up your first LM Studio session:
https://docs.icer.msu.edu/OnDemand_LMStudio/
4. Read through the “Interim Guidance on Data Uses and Risks of Generative AI.”

Workshop - Part I

- Setting up with HPCC (Terms explained)

- Cores: how many workers you want to work on this task; loading files, running the server; if you need GPU, 2-4 is enough, if you don't, you need 8-16
- RAM (amount of memory): language models are huge blobs of numbers, RAM holds that blob in memory, so we can use it; generally we do 2GB per core.
  *** If you see "not enough memory," you need to increase RAM
- GPU: imagine it being a super worker that is just really good at math with huge matrices. GPU makes it faster.
- GPU types: V100 (older generation); V100s (slightly newer); A100 (faster)
- Node type: different types of CPU architectures, if you use GPU, it doesn't matter much.

Workshop - Part I

- Play with the model
  - Once you get the LM Studio up and running, you can select between different models and test it with any questions.

Workshop - Part II

- UURAF!

1. Rebecca and Theo: start the UURAF application (app.mystory.msu.edu), **due 2/12**. (You do not need to have all materials finalized)
   Select “digital humanities” if you can find the tag
1. Rebecca: invite Teddy to the project, add Titi as mentor; Theo: add Kristen as mentor
2. All: edit the abstract, make final adjustment, **due 3/12.**
3. All: continue to work on the project, **until 4/17.**
4. All: complete RCR training in the system, prior to 4/17.
5. Final presentation: **April 17** at the Breslin Center and Online

Workshop - Part II

- UURAF!
  - Per their email: “As you submit a registration, you will automatically receive an email with more information.”
  - “Our office hosts workshops for undergraduate students to attend and I highly recommend stopping by some of the workshops we host if students have any questions or concerns about UURAF.”

Date	Time	Workshop	Location
Feb 6	7:00-8:00pm	Writing Abstracts	2110 STEM Bldg.
Feb 10	5:00-6:00pm	Intro to UURAF	2110 STEM Bldg.
Mar 16	7:00-8:00pm	Presenting at UURAF	2110 STEM Bldg.
Mar 25	6:00-7:00pm	Presenting at UURAF	2110 STEM Bldg.
Apr 10	5:00-6:00pm	Presenting at UURAF	2110 STEM Bldg.

Workshop - Part III

- Feedback on UURAF’s abstract

Week 4 Assignment

- Select a language model on LMStudio, explain why you picked this one (short rationale + screenshot).
